SUMMARY

Python Developer and Machine Learning enthusiast with hands-on experience building end-to-end ML systems using Python, scikit-learn, and FastAPI. Developed real-time prediction pipelines and deployed models with REST APIs and Streamlit interfaces. Seeking an entry-level role in Python development or applied machine learning.

EDUCATION

Bachelor Of Technology in Electronics And Computer Engineering

Marathawada Institute Of Technology

12/2021 - 12/2025

Chh. Sambhajinagar (Aurangabad), Maharashtra

EXPERIENCE

Cloud Computing Trainee

Eduversity

02/2025 - 05/2025

India

- Gained hands-on exposure to cloud computing fundamentals and AWS services through guided training
- Understood basics of cloud deployment, services, and infrastructure concepts

PROJECTS

Credit Card Fraud Detection

Python, scikit-learn, FastAPI, Streamlit, SMOTE, Pandas, NumPy

<https://github.com/SiddhikaNitnaware/credit-card-fraud-detection-ml.git>

Developed a machine learning fraud detection system using Python, scikit-learn, Random Forest, and SMOTE to handle imbalanced financial data. Deployed the model via FastAPI with a Streamlit interface for real-time prediction.

Fake News Detector

Scikit-learn, NLP, TF-IDF, Pandas

<https://github.com/SiddhikaNitnaware/fake-news-detector.git>

Built an NLP-based classification system using TF-IDF and Logistic Regression to identify fake vs. real news articles from large datasets. Implemented preprocessing and evaluation to achieve high classification accuracy.

Spam Email Classifier

Natural Language Processing, TF-IDF, Scikit-learn

<https://github.com/SiddhikaNitnaware/spam-email-classifier.git>

Designed a spam detection model using text preprocessing and machine learning algorithms to classify emails as spam or legitimate. Applied vectorization techniques such as Bag-of-Words and TF-IDF.

Handwritten Digit Recognition

Python, scikit-learn, NumPy, Pandas, Matplotlib

<https://github.com/SiddhikaNitnaware/Handwritten-Digit-Recognition.git>

Implemented a digit recognition system using KNN to classify handwritten numerical images and optimized model parameters for improved prediction accuracy.

SKILLS

Python

NLP

Machine Learning

Git

Problem Solving

Self-Learning

FastAPI

Streamlit

Model Evaluation

CERTIFICATIONS

Cloud Computing Internship
